SUBJECT INDEX FOR VOLUME 59, 1984

A

Absorption
  Excretion and tissue residue in feedlot heifers injected with the synthetic prostaglandin, fenprostalene, 164
Additive genetic
  Estimates of, maternal and specific combining abilities for some litter traits of swine, 1140
Adipocytes
  Receptor-dependent and independent degradation of insulin by isolated swine, at 37 C, 366
Adipose tissue
  Effects of feeding pattern and dietary regimen on growth and, cellularity in polygenic obese mice, 350
Agglutination titers
  Breed and swine lymphocyte antigen haplotype differences in, following vaccination with B. bronchiseptica, 643
Alcohol treatments
  Effect of, of soybean meal on ruminal escape of soybean meal protein, 483
Alfalfa silage
  Digestibility of wheat and, with and without wheat straw, 476
Alternative selection strategies
  Mathematical modeling of, for beef production, 308
Aluminum
  Influence of, as sulfate, chloride and citrate on magnesium and calcium metabolism in sheep, 798
Aluminum, dietary
  Influence of, on nutrient utilization in ruminants, 836
Amino acid
  Arsenic-sulfur, interactions in the chick, 1573
  Availability and urea recycling in finishing swine fed barley-based diets supplemented with soybean meal or sunflower meal, 409
  Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on dry matter, energy, protein and, digestibilities in cannulated pigs, 1510
  Effects of level of feed intake on nitrogen, and energy digestibilities measured at the end of the small intestine and over the total digestive tract of growing pigs, 717
Amino acids
  Effects of various methane inhibitors on the fermentation of, by mixed rumen microorganisms in vitro, 1329
Ammonia
  Influence of adding, to corn stalklage on feeding value for dairy cows and on fermentation changes, 567
Ammoniated roughages
  Protein supplementation of,.
    I. Corncobs supplemented with a blood meal-corn gluten meal mixture—Lamb studies, 1601
Anestrous ewes
  Effects of a single injection of LHRH on the response of, to the introduction of rams, 277
Angus
  Castration and sire effects on carcass traits, meat palatability and muscle fiber characteristics in, cattle, 981
  Growth patterns of, Charolais, Charolais X Angus and Holstein X Angus cows from birth to maturity, 957
  Growth patterns of, Hereford and Shorthorn cattle.
    I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
    II. Relationship of growth patterns of dams with progeny performance, 1205
  Immunosuppressive effect of uterine secretory protein from, and Brahman cows upon lymphocytes in vitro, 1047
  Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and efficiency of, cow-calf pairs grazing fescue-legume or fescue pastures, 1411
  Lifetime productivity of purebred and crossbred cows of, and Milking Shorthorn parentage: Weights and scores, 1451
  Ovarian and uterine morphology and function in, and Brahman cows, 1026
  Shipping suppresses lymphocyte blastogenic responses in, and Brahman X Angus feeder calves, 576
  Sire breed effects in matings with, cows:
    I. Fertility, calf survival and performance to 18 months, 11
    II. Carcass characteristics of steer progeny, 23
  Testicular development, epididymal sperm reserves and seminal quality in two-year-old Hereford and, bulls: Effects of two levels of dietary energy, 432
Animal
  Potential interactions of ionophore drugs with divalent cations and their function in the, body, 845
Animal growth
  Endocrine regulation of fetal and postnatal meat, 511
Animals
  Nickel as a "Newer Trace Element" in the nutrition of domestic, 823
Antigen
  Breed and swine lymphocyte, haplotype differences in agglutination titers following vaccination with B. bronchiseptica, 643
Arginine
  Effects of graded levels of lysine and excess, and threonine on young pigs fed practical diets, 135
Arsenic-sulfur
  Amino acid interactions in the chick, 1573
Artificial inseminating technique, bovine
  Radiographic evaluation of, among professional and herdsman-inseminators using .5- and .25-ml French straws, 1671
Awards
  American Society of Animal Science, 1703

ASAS Honorary Fellows, 1714
Block and Bridle
1984 Outstanding Senior, 1724
Midwestern Section ASAS
1984 Younger Animal Scientist Extension, 1726
1984 Younger Animal Scientist Research, 1728
1984 Younger Animal Scientist Teaching, 1730
Northeastern Section ADSA-ASAS
1984 Young Scientist, 549
Northeastern Section ASAS
1984 Distinguished Service, 547
Southern Section ASAS
1984 Distinguished Service, 253
1984 Extension, 255
Graduate student winners, 256
1984 Past President, 257
1984 Young Animal Scientist, 254
Undergraduate Scholarship Medals, 258

B

β-adrenergic agonist
Use of a, to alter muscle and fat deposition in lambs, 1256
β-agonist
Use of a, to alter fat and muscle deposition in steers, 1247
Barley-based diets
Amino acid availability and urea recycling in finishing swine fed, supplemented with soybean meal or sunflower meal, 409
Barleys
Chemical composition and protein quality evaluation of high lysine, fed to growing rats and pigs, 1011
Barrows
Efficacy of thiopeptin as a growth promotant for growing, and gilts—A cooperative study, 892
B. bronchiseptica
Breed and swine lymphocyte antigen haplotype differences in agglutination titers following vaccination with, 643
Beef
Effects of dam age, prepartum nutrition and duration of labor on productivity and postpartum reproduction in, females, 1
Evidence against chronic teat stimulation as an autonomous effector of diminished gonadotropin release in, cows, 1060
Growth, N^{τ}-methylhistidine excretion and muscle protein degradation in growing, steers, 1262
Lighting type and intensity effects on, carcass grade factors, 105
Selection and concurrent inbreeding in simulated, herds: Model development, 1488
Beef cattle
Effects of additional limestone of various types on feedlot performance of, fed high corn diets differing in processing method and potassium level, 791
Nutritive value of warm-season grass hays for, and sheep: Digestibility, intake and mineral utilization, 1582
Beef cows
Ability of indomethacin to alter prostaglandin metabolite concentrations and to enhance the function of corpora lutea induced in postpartum suckled, 177
Influence of exposure to bulls on resumption of estrous cycles following parturition in, 1135
Labile magnesium reserves in, subjected to different prepasture supplementation regimens, 197
Beef production
Mathematical modeling of alternative selection strategies for, 308
Biotin
Response of sows and litters to added dietary, in environmentally regulated facilities, 151
Birth
Growth patterns of Angus, Charolais, Charolais × Angus and Holstein × Angus cows from, to maturity, 957
Birth weight
Genetic variance components of, in a herd of unselected cattle, 1459
Blood
Effects of long-term consumption of sewage solids on, milk and tissue elemental composition of breeding ewes, 416
Relationships between the H and A-O, types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior selection line of Swiss Landrace pigs, 1440
Blood composition
Effects of seleniferous grains and inorganic selenium on tissue and, and growth performance of rats and swine, 725
Blood flow
Steroid secretion and nutrient uptake of the gravid uterus during the periparturient period in sows, 1085
Blood meal
Combinations of peanut meal and, as substitutes for soybean meal in corn-based, growing-finishing pig diets, 394
Protein supplementation of ammoniated roughages.
I. Corncobs supplemented with a, -corn gluten meal mixture—Lamb studies, 1601
Boars
An evaluation of four procedures to rank centrally tested, 934
Reproductive performance for four breeds of swine: Crossbred females and purebred and crossbred, 948
Body composition
Effects of maternal streptozotocin-diabetes on fetal growth, energy reserves and, of newborn pigs, 974
Influence of photoperiod and prolactin on, and in vitro lipid metabolism in wether lambs, 95
In vivo, estimation in nongravid and reproducing first-litter sows with deuterium oxide, 1239
The influence of photoperiod on body weight gain, nutrient intake and hormone secretion, 1610
Body weight
Direct and maternal genetic differences between lines of mice selected for, and litter size: Traits

of dams, 630
Direct and maternal genetic differences between lines of mice selected for, and litter size: Traits of offspring, 908
Prenatal and postnatal effects in mouse lines selected for, and litter size: Performance of postnatal dams and growth of progeny, 896
Body weight gain
The influence of photoperiod on, body composition, nutrient intake and hormone secretion, 1610
Bone dimensions
Effect of maternal diet on skeletal muscle composition and metabolism and on, and composition of the fetal pig, 1003
Bovine
Characteristics of, spermatozoa after migration through a bovine serum albumin gradient, 454
Cyanogenesis in, rumen fluid and pure cultures of rumen bacteria, 784
Development of methods to measure activity of polysomes and cytoplasmic enzymes from, skeletal muscle in in vitro protein-synthesis assays, 666
Effects of dietary regimen and tissue site on, fatty acid profiles, 109
Inheritance of maternal immunoglobulin G_1 concentration by the, neonate, 39
Relative roles of polysomes and cytoplasmic enzymes in regulating, skeletal muscle protein synthesis, 684
Sex differences in plasma cortisol and growth in the, 376
Bovine artificial inseminating technique
Radiographic evaluation of, among professional and herdsman-inseminators using .5- and .25-ml French straws, 1671
Bovine muscle glycogen
As affected by fasting and refeeding, 384
Brahman
Immunosuppressive effect of uterine secretory protein from Angus and, cows upon lymphocytes in vitro, 1047
Ovarian and uterine morphology and function in Angus and, cows, 1026
Brahman X Angus
Shipping suppresses lymphocyte blastogenic responses in Angus and, feeder calves, 576
Brain control
The role of the rat in research on control of ingestion: A commentary and review of recent advances in understanding, of food intake, 1373
Breed
And sire effects on crossbred lamb production from Panama ewes and on spermatozoan midpiece length, 29
And swine lymphocyte antigen haplotype differences in agglutination titers following vaccination with B. bronchiseptica, 643
Characterization of cattle of a five, diallel.
V. Breed and heterosis effects on carcass merit, 922
Efficacy of using vaginal conductivity as an indicator of the optimum time to, in swine, 869
Breed, sire
Effects in matings with Angus cows:
I. Fertility, calf survival and performance to 18 months, 11
II. Carcass characteristics of steer progeny, 23
Breeding
Extension of a reduced animal model to recursive prediction of, values, 1164
Fertility of ewe lambs maintained indoors yearround on an accelerated, program, 1129
Breeding ewes
Effects of long-term consumption of sewage solids on blood, milk and tissue elemental composition of, 416
Breeds
Reproductive performance for four, of swine: Crossbred females and purebred and crossbred boars, 948
Sow productivity comparisons for four, of swine: Purebred and crossbred litters, 941
Brown Swiss
Environmental and genetic variation in milk yield of native cattle and crosses with, in India, 74
Bulls
Influence of exposure to, on resumption of estrous cycles following parturition in beef cows, 1135
Testicular development, epididymal sperm reserves and seminal quality in two-year-old Hereford and Angus,: Effects of two levels of dietary energy, 432
Thermal shrinkage temperature of intramuscular collagen of, and steers, 706
Bulls, Hereford
The effects of sexual stimulation on the sexual performance of, 294

C

Calcium
Effects of source and particle size on the biological availability of, in calcium supplements for growing pigs, 125
Influence of aluminum as sulfate, chloride and citrate on magnesium and, metabolism in sheep, 798
Calcium phosphates
Effect of, and zinc in salt-mineral mixtures on ad libitum salt-mix intake and on zinc and selenium status of sheep, 1594
Calcium supplements
Effects of source and particle size on the biological availability of calcium in, for growing pigs, 125
Calf
Sire breed effects in mating with Angus cows:
I. Fertility, survival and performance to 18 months, 11
Calf production
Nutrient intake and efficiency of, by two-breed cross cows, 317
Calves
Shipping suppresses lymphocyte blastogenic responses in Angus and Brahman X Angus feeder, 576
Cannulated pigs
Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on dry matter, energy, protein and amino acid digestibilities in, 1510

Carcass
Castration and sire effects on, traits, meat palatability and muscle fiber characteristics in Angus cattle, 981
Characterization of cattle of a five breed diallel. V. Breed and heterosis effects on, merit, 922
The effect of parenteral use of estradiol, progesterone, testosterone and trenbolone on growth and, composition in pigs, 1501
Carcass, beef
Lighting type and intensity effects on, grade factors, 105
Carcass characteristics
Effects of dietary sewage solids on feedlot performance, serum constituents and tissue elements of growing lambs, 425
Sire breed effects in mating with Angus cows: II. , of steer progeny, 23
Castration
And sire effects on carcass traits, meat palatability and muscle fiber characteristics in Angus cattle, 981
The effect of, estradiol and LHRH on LH secretion of lambs fed different levels of dietary energy, 460
Cations, divalent
Potential interactions of ionophore drugs with, and their function in the animal body, 845
Cattle
A silicone esophageal cannula; Its surgical installation and use in research with grazing, sheep or goats, 204
Aspects of ingestive behavior in, 1369
Castration and sire effects on carcass traits, meat palatability and muscle fiber characteristics in Angus, 981
Characterization of, of a five breed diallel. V. Breed and heterosis effects on carcass merit, 922
Effects of additional limestone of various types on feedlot performance of beef, fed high corn diets differing in processing method and potassium level, 791
Effect of sodium bicarbonate and tetrasodium pyrophosphate upon utilization of concentrate- and roughage-based, diets: Cattle studies, 1309
Environmental and genetic variation in milk yield of native, and crosses with Brown Swiss in India, 74
Forage composition and growth and physiological characteristics of, grazing several varieties of tall fescue during summer conditions, 584
Forage sources for growing, 1115
Genetic variance components of birth weight in a herd of unselected, 1459
Growth patterns of Angus, Hereford and Shorthorn,. I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
II. Relationship of growth patterns of dams with progeny performance, 1205
Inositol as a lipotropic agent in dairy, diets, 806
Mixed model sire evaluation with dairy, – Experience and genetic gain, 529
Nutritive value of warm-season grass hays for beef, and sheep; Digestibility, intake and mineral utilization, 1582
Sire X environment interactions for growth traits of Hereford, 1467
The influence of the stage of the estrous cycle and novel cows upon mounting activity of dairy, 1430
Cattle diets
Effect of selected dietary buffers upon utilization of concentrate- or roughage-based,: Laboratory studies, 227
Cattle production systems
To meet future consumer demands, 1631
Cell monolayers, endometrial
In vitro development of procine embryos in coculture with, or culture supernatants, 1657
Cellulase activity
Influence of dietary fiber on the performance and, of growing-finishing swine, 388
Charolais
Growth patterns of Angus, Charolais X Angus and Holstein X Angus cows from birth to maturity, 957
Chemical composition
And protein quality evaluation of high lysine barleys fed to growing rats and pigs, 1011
Chick
Arsenic-sulfur amino acid interactions in the, 1573
Effect of 3-nitro-4-hydroxyphenylarsonic acid on copper utilization by the pig, rat and, 997
Chilling method
Effect of, and electrical stimulation on pork quality, 697
Chloride
Influence of aluminum as sulfate, and citrate on magnesium and calcium metabolism in sheep, 798
Citrate
Influence of aluminum as sulfate, chloride and, on magnesium and calcium metabolism in sheep, 798
Clinoptilolite
Effects of zeolite A or, in diets of growing swine, 1536
Response of growing lambs to, or zeolite NaA added to corn, corn-fish meal and corn-soybean meal diets, 1320
Collagen
Thermal shrinkage temperature of intramuscular, of bulls and steers, 706
Colostrum
Isolation of lactoferrin and its concentration in sows', and milk during a 21-day lactation, 1080
Colts
Active immunization of prepubertal, against estrogens: Hormonal and testicular responses after puberty, 189
Concentrate-
Effect of selected dietary buffers upon utilization of, or roughage-based cattle diets: Laboratory studies, 227
Effect of sodium bicarbonate and tetrasodium pyrophosphate upon utilization of, and roughage-based cattle diets: Cattle studies, 1309
Consumer demands

Cattle production systems to meet future, 1631
Copper
Effects of 3-nitro-4-hydroxyphenylarsonic acid on, utilization by the pig, rat and chick, 997
Influence of molybdenum and sulfate supplementation and withdrawal of diets containing high, broiler litter on tissue copper levels in ewes, 210
Corn
Combinations of peanut meal and blood meal as substitutes for soybean meal in, -based growing-finishing pig diets, 394
Effects of additional limestone of various types on feedlot performance of beef cattle fed high, diets differing in processing method and potassium level, 791
Influence of supplementation of corn stover with, grain on the fibrolytic bacteria in the rumen of sheep and their relation to the intake and digestion of fiber, 772
Response of growing lambs to clinoptilolite or zeolite NaA to, corn-fish meal and corn-soybean meal diets, 1320
Corncobs
Protein supplementation of ammoniated roughages.
I. , supplemented with a blood meal-corn gluten meal mixture—Lamb studies, 1601
Corn-fish meal
Response of growing lambs to clinoptilolite or zeolite NaA added to corn, and corn-soybean meal diets, 1320
Corn gluten meal
Protein supplementation of ammoniated roughages.
I. Corncobs supplemented with a blood meal-, mixture—Lamb studies, 1601
Corn hybrids
Effects of processing (grinding versus rolling) of normal and mutant, on performance of growing pigs, 875
Corn-soybean meal
Response of growing lambs to clinoptilolite or zeolite NaA added to corn, corn-fish meal and, diets, 1320
Toxic effects of selenium on growing swine fed, diets, 733
Corn stalklage
Influence of adding ammonia to, on feeding value for dairy cows and on fermentation changes, 567
Corn stover
Influence of supplementation of, with corn grain on the fibrolytic bacteria in the rumen of sheep and their relation to the intake and digestion of fiber, 772
Corpora lutea
Ability of indomethacin to alter prostaglandin metabolite concentrations and to enhance the function of, induced in postpartum suckled beef cows, 177
Corpus luteum
Maintenance of the, of early pregnancy in the ewe.
III. Differences between pregnant and nonpregnant ewes in luteal responsiveness to prostaglandin $F_2\alpha$, 746
Cow-calf pairs
Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and efficiency of Angus, grazing fescue-legume or fescue pastures, 1411
Relationships between traits of, and a measure of partial efficiency, 1176
Cow frame size
Influence of, and fatness on seasonal patterns of forage intake, performance and efficiency of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Cows
Ability of indomethacin to alter prostaglandin metabolite concentrations and to enhance the function of corpora lutea induced in postpartum suckled beef, 177
Evidence against chronic teat stimulation as an autonomous effector of diminished gonadotropin release in beef, 1060
Growth patterns of Angus, Charolais, Charolais X Angus and Holstein X Angus, from birth to maturity, 957
Immunosuppressive effect of uterine secretory protein from Angus and Brahman, upon lymphocytes in vitro, 1047
Influence of adding ammonia to corn stalklage on feeding value for dairy, and on fermentation changes, 567
Influence of exposure to bulls on resumption of estrous cycles following parturition in beef, 1135
Labile magnesium reserves in beef, subjected to different prepasture supplementation regimens, 197
Lifetime productivity of purebred and crossbred, of Angus and Milking Shorthorn parentage: Weight and scores, 1451
Nutrient intake and efficiency of calf production by two-breed cross, 317
Ovarian and uterine morphology and function in Angus and Brahman, 1026
Production of estradiol by each ovary during the estrous cycle of, 764
Sire breed effects in matings with Angus,:
I. Fertility, calf survival and performance to 18 months, 11
II. Carcass characteristics of steer progeny, 23
Cows, novel
The influence of the stage of the estrous cycle and, upon mounting activity of dairy cattle, 1430
Crossbred
Lifetime productivity of purebred and, cows of Angus and Milking Shorthorn parentage: Weights and scores, 1451
Reproductive performance for four breeds of swine:, females and purebred and crossbred boars, 948
Sow productivity comparisons for four breeds of swine: Purebred and, litters, 941
Crossbred ewes
A comparison of Dorset and Finnish Landrace, 329
Genetic, environmental and interaction effects on lifetime production efficiency of, 594
Culture filtrate
The effects of intestinal Escherichia coli 263, intravenous infusion of Escherichia coli 263,

and iron dextran supplementation on iron metabolism in the young pig, 1519
Culture supernatants
In vitro development of porcine embryos in coculture with endometrial cell monolayers or, 1657
Cultures
Cyanogenesis in bovine rumen fluid and pure, of rumen bacteria, 784
Cyanogenesis
In bovine rumen fluid and pure cultures of rumen bacteria, 784
Cyclic
Cytoplasmic and nuclear estrogen receptors and leucine incorporation in endometrium of, and pregnant pigs to day 19 postestrus, 1286
Cytoplasmic
And nuclear estrogen receptors and leucine incorporation in endometrium of cyclic and pregnant pigs to day 19 postestrus, 1286
Cytoplasmic enzymes
Development of methods to measure activity of polysomes and, from bovine skeletal muscle in in vitro protein-synthesis assays, 666
Relative roles of polysomes and, in regulating bovine skeletal muscle protein synthesis, 684

D

Dacron bags
Influence of dietary protein and energy on disappearance of dry matter from different forage types from, suspended in the rumen, 246
Dairy cattle
Inositol as a lipotropic agent in, diets, 806
Mixed model sire evaluation with,—Experience and genetic gain, 529
The influence of the stage of the estrous cycle and novel cows upon mounting activity of, 1430
Dairy cows
Influence of adding ammonia to corn stalklage on feeding value for, and on fermentation changes, 567
Dam
Between and within litter variation, sex effects and trends in sire and, transmitting abilities of performance tested pigs in Ontario, 338
Dam age
Effects of, prepartum nutrition and duration of labor on productivity and postpartum reproduction in beef females, 1
Dams
Direct and maternal genetic differences between lines of mice selected for body weight and litter size: Traits of, 630
Growth patterns of Angus, Hereford and Shorthorn cattle.
II. Relationship of growth patterns of, with progeny performance, 1205
Prenatal and postnatal effects in mouse lines selected for body weight and litter size: Performance of postnatal, and growth of progeny, 896
Degradation
Growth, N^{τ}-methylhistidine excretion and muscle protein, in growing beef steers, 1262
Receptor-dependent and independent, of insulin by isolated swine adipocytes at 37 C, 366
Deuterium oxide
In vivo body composition estimation in nongravid and reproducing first-litter sows with, 1239
Development
An investigation of the effect of Hesperidin Complex and Lemon Bioflavonoid Complex on growth and, of Thoroughbred horses, 1529
Dextrose
Yield and composition of milk and weight gain of nursing pigs from sows fed diets containing fructose or, 141
Diet
Effect of maternal, on skeletal muscle composition and metabolism and on bone dimensions and composition of the fetal pig, 1003
Dietary biotin
Response of sows and litters to added, in environmentally regulated facilities, 151
Dietary buffers
Effect of selected, upon utilization of concentrate- or roughage-based cattle diets: Laboratory studies, 227
Dietary component
Effect of sand or soil as a, on phosphorus utilization by sheep, 1092
Dietary energy
Testicular development, epididymal sperm reserves and seminal quality in two-year-old Hereford and Angus bulls: Effects of two levels of, 432
The effect of castration, estradiol and LHRH on LH secretion of lambs fed different levels of, 460
Dietary fiber
Influence of, on the performance and cellulase activity of growing-finishing swine, 388
Dietary protein
Influence of, and energy on disappearance of dry matter from different forage types from Dacron bags suspended in the rumen, 246
Dietary regimen
Effects of, and tissue site on bovine fatty acid profiles, 109
Effects of feeding pattern and, on growth and adipose tissue cellularity in polygenic obese mice, 350
Dietary sewage solids
Effects of, on feedlot performance, carcass characteristics, serum constituents and tissue elements of growing lambs, 425
Diets
Amino acid availability and urea recycling in finishing swine fed barley-based, supplemented with soybean meal or sunflower meal, 409
Combinations of peanut meal and blood meal as substitutes for soybean meal in corn-based, growing-finishing pig, 394
Effect of sodium bicarbonate and tetrasodium pyrophosphate upon utilization of concentrate- and roughage-based cattle,: Cattle studies, 1309
Effects of graded levels of lysine and excess arginine and threonine on young pigs fed practical, 135
Effects of zeolite A or clinoptilolite in, of growing swine, 1536

Efficacy of furazolidone in grower, on subsequent performance of swine—A cooperative study, 863
Inositol as a lipotropic agent in dairy cattle, 806
Response of growing lambs to clinoptilolite or zeolite NaA added to corn, corn-fish meal and corn-soybean meal, 1320
Toxic effects of selenium on growing swine fed corn-soybean meal, 733
Yield and composition of milk and weight gain of nursing pigs from sows fed, containing fructose or dextrose, 141
Digestibility
Effect of elemental sulfur supplementation on, and metabolism of early vegetative and fall-accumulated regrowth fescue hay by wethers, 1100
Nutritive value of warm-season grass hays for beef cattle and sheep; intake and mineral utilization, 1582
Of wheat and alfalfa silage with and without wheat straw, 476
Digestion
Comparative, rumen fermentation and kinetics of forage by steers and wethers, 237
Influence of limestone level in high concentrate and high roughage diets on site and extent of, in lambs, 217
Influence of supplementation of corn stover with grain on the fibrolytic bacteria in the rumen of sheep and their relation to the intake and, of fiber, 772
Digestive tract
Effects of level of feed intake on nitrogen, amino acid and energy digestibilities measured at the end of the small intestine and over the total, of growing pigs, 717
Domestic animals
Nickel as a "Newer Trace Element" in the nutrition of, 823
Dorset
A comparison of, and Finnish Landrace crossbred ewes, 329
Drugs
Potential interactions of ionophore, with divalent cations and their function in the animal body, 845
Dry ammoniation
Effect of high moisture and, of wheat straw on its feeding value for lambs, 559
Dry matter
Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on, energy, protein and amino acid digestibilities in cannulated pigs, 1510
Influence of dietary protein and energy on disappearance of, from different forage types from Dacron bags suspended in the rumen, 246

E

Early life traits
Phenotypic relationships among, and lifetime ewe production efficiency, 607
Economic traits
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and, in a superior and an inferior selection line of Swiss Landrace pigs, 1440
Editorial policy and procedures, 1388
Efficiency
Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and, of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Electrical stimulation
Effect of chilling method and, on pork quality, 697
Embryos, porcine
In vitro development of, in coculture with endometrial cell monolayers or culture supernatants, 1657
Endocrine regulation
A review of, of metabolism during lactation, 498
Of fetal and postnatal meat animal growth, 511
Endocrinology
The analysis of repeated measures experiments in, 1070
Endometrial cell monolayers
In vitro development of porcine embryos in coculture with, or culture supernatants, 1657
Endometrium
Cytoplasmic and nuclear estrogen receptors and leucine incorporation in, of cyclic and pregnant pigs to day 19 postestrus, 1286
Energy
Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on dry matter, protein and amino acid digestibilities in cannulated pigs, 1510
Influence of dietary protein and, on disappearance of dry matter from different forage types from Dacron bags suspended in the rumen, 246
Energy digestibilities
Effects of level of feed intake on nitrogen, amino acid and, measured at the end of the small intestine and over the total digestive tract of growing pigs, 717
Energy reserves
Effects of maternal streptozotocin-diabetes on fetal growth, and body composition of newborn pigs, 974
Energy utilization
Of weanling pigs raised under pen conditions, 738
Environment interactions
Sire X, for growth traits of Hereford cattle, 1467
Environmental
Genetic, and interaction effects on lifetime production efficiency of crossbred ewes, 594
Environmental factors
Effects of water flow restriction and, on performance of nursery-age pigs, 1423
Environmentally regulated facilities
Response of sows and litters to added dietary biotin in, 151
Enzyme systems
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell, and halothane sensitivity, and economic traits in a superior and an inferior selection line of Swiss Landrace pigs, 1440

Enzymes
Development of methods to measure activity of polysomes and cytoplasmic, from bovine skeletal muscle in in vitro protein-synthesis assays, 666
Enzymes, proteolytic
The contribution of, to postmortem changes in muscle, 1644
Epididymal sperm reserves
Testicular development, and seminal quality in two-year-old Hereford and Angus bulls: Effects of two levels of dietary energy, 432
Ergonovine
Improvement by, of sperm transport, fertilization and pregnancy rates in ewes in natural or prostaglandin-induced estrus, 754
Errata
268, 862, 1732
Escherichia coli 263
The effects of intestinal, intravenous infusion of Escherichia coli 263 culture filtrate and iron dextran supplementation on iron metabolism in the young pig, 1519
Esophageal cannula
A silicone,: Its surgical installation and use in research with grazing cattle, sheep or goats, 204
Estradiol
Production, by each ovary during the estrous cycle of cows, 764
The effect of castration, and LHRH on LH secretion of lambs fed different levels of dietary energy, 460
The effect of parenteral use of, progesterone, testosterone and trenbolone on growth and carcass composition in pigs, 1501
Estrogen
Cytoplasmic and nuclear, receptors and leucine incorporation in endometrium of cyclic and pregnant pigs to day 19 postestrus, 1286
Follicular growth and production of, and progesterone after injection of gilts with human chorionic gonadotropin on day 12 of the estrous cycle, 1295
Estrogens
Active immunization of prepubertal colts against,: Hormonal and testicular responses after puberty, 189
Estrous cycle
Follicular growth and production of estrogen and progesterone after injection of gilts with human chorionic gonadotropin on day 12 of the, 1295
Production of estradiol by each ovary during the, of cows, 764
The influence of the stage of the, and novel cows upon mounting activity of dairy cattle, 1430
Estrous cycles
Influence of exposure to bulls on resumption of, following parturition in beef cows, 1135
Estrus
Improvement by ergonovine of sperm transport, fertilization and pregnancy rates in ewes in natural or prostaglandin-induced, 754
Evaluation
Mixed model sire, with dairy cattle—Experience and genetic gain, 529
Ewe
Fertility of, lambs maintained indoors yearround on an accelerated breeding program, 1129
Maintenance of the corpus luteum of early pregnancy in the,.
III. Differences between pregnant and nonpregnant ewes in luteal responsiveness to prostaglandin $F_2\alpha$, 746
Phenotypic relationships among early life traits and lifetime, production efficiency, 607
Ewes
A comparison of Dorset and Finnish Landrace crossbred, 329
Effects of a single injection of LHRH on the response of anestrous, to the introduction of rams, 277
Effects of long-term consumption of sewage solids on blood, milk and tissue elemental composition of breeding, 416
Genetic, environmental and interaction effects on lifetime production efficiency of crossbred, 594
Improvement by ergonovine of sperm transport, fertilization and pregnancy rates in, in natural or prostaglandin-induced estrus, 754
Influence of molybdenum and sulfate supplementation and withdrawal of diets containing high copper broiler litter on tissue copper levels in, 210
Ewes, Panama
Breed and sire effects on crossbred lamb production from, and on spermatozoan midpiece length, 29
Ewes, pregnant and nonpregnant
Maintenance of the corpus luteum of early pregnancy in the ewe.
III. Differences between, in luteal responsiveness to prostaglandin $F_2\alpha$, 746
Excretion
Absorption, and tissue residue in feedlot heifers injected with the synthetic prostaglandin, fenprostalene, 164

F

Farrowing, ages at
Heritability estimates for, rebreeding interval and litter traits in swine, 67
Fasting
Bovine muscle glycogen as affected by, and refeeding, 384
Fat
Use of a β-adrenergic agonist to alter muscle and, deposition in lambs, 1256
Use of a β-agonist to alter, and muscle deposition in steers, 1247
Fatness
Influence of cow frame size and, on seasonal patterns of forage intake, performance and efficiency of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Fats
Comparative utilization of in-seed, and the respective extracted fats by the young pig, 1557

Fatty acid profiles
Effects of dietary regimen and tissue site on bovine, 109
Feeder calves
Shipping suppresses lymphocyte blastogenic responses in Angus and Brahman X Angus, 576
Feeding
Controls of, in horses, 1354
Controls of, in pigs, 1345
Feeding pattern
Effects of, and dietary regimen on growth and adipose tissue cellularity in polygenic obese mice, 350
Feeding value
Effect of high moisture and dry ammoniation of wheat straw on its, for lambs, 559
Influence of adding ammonia to corn stalklage on, for dairy cows and on fermentation changes, 567
Feedlot performance
Effects of additional limestone of various types on, of beef cattle fed high corn diets differing in processing method and potassium level, 791
Effects of dietary sewage solids on, carcass characteristics, serum constituents and tissue elements of growing lambs, 425
Feed intake
Control of, in sheep, 1362
Effects of level of, on nitrogen, amino acid and energy digestibilities measured at the end of the small intestine and over the total digestive tract of growing pigs, 717
Females
Reproductive performance for four breeds of swine: Crossbred, and purebred and crossbred boars, 948
Fenprostalene
Absorption, excretion and tissue residue in feedlot heifers injected with the synthetic prostaglandin, 164
Fermentation
Effects of various methane inhibitors on the, of amino acids by mixed rumen microoganisms in vitro, 1329
Influence of adding ammonia to corn stalklage on feeding value for dairy cows and on, changes, 567
Fertility
Influence of reduced litter size and daily litter separation on, of sows at 2 to 5 weeks postpartum, 284
Of ewe lambs maintained indoors year-round on an accelerated breeding program, 1129
Sire breed effects in matings with Angus cows:
I. , calf survival and performance to 18 months, 11
Fertilization
Effects of magnesium sulfate supplementation and, on quality and mineral utilization of timothy hays by sheep, 1403
Improvement by ergonovine of sperm transport, and pregnancy rates in ewes in natural or prostaglandin-induced estrus, 754
Fescue
Forage composition and growth and physiological characteristics of cattle grazing several varieties of tall, during summer conditions, 584
Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and efficiency of Angus cow-calf pairs grazing fescue-legume or, pastures, 1411
Fescue hay
Effect of elemental sulfur supplementation on digestibility and metabolism of early vegetative and fall-accumulated regrowth, by wethers, 1100
Fescue-legume
Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and efficiency of Angus cow-calf pairs grazing, or fescue pastures, 1411
Fetal
Endocrine regulation of, and postnatal meat animal growth, 511
Role of uteroferrin in placental iron transport: Effect of maternal iron treatment on, iron and uteroferrin content and neonatal hemoglobin, 1303
Fetal growth
Effects of maternal streptozotocin-diabetes on, energy reserves and body composition of newborn pigs, 974
Fetal pig
Effect of maternal diet on skeletal muscle composition and metabolism and on bone dimensions and composition of the, 1003
Fiber
Effects of, and virginiamycin on nutrient absorption, nutrient retention and rate of passage in growing swine, 400
Influence of supplementation of corn stover with corn grain on the fibrolytic bacteria in the rumen of sheep and their relation to the intake and digestion of, 772
Fiber source
Dark and yellow rapeseed hulls, soybean hulls and a purified,: Their effects on dry matter, energy, protein and amino acid digestibilities in cannulated pigs, 1510
Fibrolytic bacteria
Influence of supplementation of corn stover with corn grain on the, in the rumen of sheep and their relation to the intake and digestion of fiber, 772
Finishing swine
Amino acid availability and urea recycling in, fed barley-based diets supplemented with soybean meal or sunflower meal, 409
Finnish Landrace
A comparison of Dorset and, crossbred ewes, 329
First-litter
In vivo body composition estimation in nongravid and reproducing, sows with deuterium oxide, 1239
Five breed diallel
Characterization of cattle of a,.
V. Breed and heterosis effects on carcass merit, 922
Folic acid
And reproductive performances of sows, 1020
Follicular growth
And production of estrogen and progesterone after injection of gilts with human chorionic gonadotropin on day 12 of the estrous cycle, 1295

Forage
Influence of dietary protein and energy on disappearance of dry matter from different, types from Dacron bags suspended in the rumen, 246
Forage composition
And growth and physiological characteristics of cattle grazing several varieties of tall fescue during summer conditions, 584
Forage diets
Comparative digestion, rumen fermentation and kinetics of, by steers and wethers, 237
Forage intake
Influence of cow frame size and fatness on seasonal patterns of, performance and efficiency of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Forage sources
For growing cattle, 1115
French straws
Radiographic evaluation of bovine artificial inseminating technique among professional and herdsman-inseminators using .5- and .25-ml, 1671
Fructose
Yield and composition of milk and weight gain of nursing pigs from sows fed diets containing, or dextrose, 141
Furazolidone
Efficacy of, in grower diets on subsequent performance of swine—A cooperative study, 863

G

Gene
Composition of growth in mice with a major, for rapid postweaning gain, 361
Genetic
Environmental and interaction effects on lifetime production efficiency of crossbred ewes, 594
Genetic analysis
A, of sow productivity traits, 1149
Genetic concepts
The use of, and variation in the study of metabolism, 490
Genetic correlations
Of pig performance and sow productivity traits, 1477
Genetic differences
Direct and maternal, between lines of mice selected for body weight and litter size: Traits of dams, 630
Direct and maternal, between lines of mice selected for body weight and litter size: Traits of offspring, 908
Genetic gain
Mixed model sire evaluation with dairy cattle—Experience and, 529
Genetic parameters
For testes traits in swine, 967
Genetic variance
Components of birth weight in a herd of unselected cattle, 1459
Genetic variances
Estimation of, from unselected and selected populations, 1213
Gestating swine
Riboflavin requirement of, 1567
Gestation
Effect of purified zearalenone on early, in gilts, 1662
Gilts
Effect of purified zearalenone on early gestation in, 1662
Efficacy of thiopeptin as a growth promotant for growing barrows and, —A cooperative study, 892
Factors affecting ovarian compensation after unilateral ovariectomy in, 170
Follicular growth and production of estrogen and progesterone after injection of, with human chorionic gonadotropin on day 12 of the estrous cycle, 1295
Goats
A silicone esophageal cannula; Its surgical installation and use in research with grazing cattle, sheep or, 204
Gonadotropin
Evidence against chronic teat stimulation as an autonomous effector of diminished, release in beef cows, 1060
Follicular growth and production of estrogen and progesterone after injection of gilts with human chorionic, on day 12 of the estrous cycle, 1295
Grade factors
Lighting type and intensity effects on beef carcass, 105
Grains
Effects of seleniferous, and inorganic selenium on tissue and blood composition and growth performance of rats and swine, 725
Grass hays
Nutritive value of warm-season, for beef cattle and sheep; Digestibility, intake and mineral utilization, 1582
Gravid uterus
Blood flow, steroid secretion and nutrient uptake of the, during the periparturient period in sows, 1085
Grazing
Forage composition and growth and physiological characteristics of cattle, several varieties of tall fescue during summer conditions, 584
Influence of cow frame size and fatness on seasonal patterns of forage intake, performance and efficiency of Angus cow-calf pairs, fescue-legume or fescue pastures, 1411
Grower diets
Efficacy of furazolidone in, on subsequent performance of swine—A cooperative study, 863
Growing
Effects of dietary sewage solids on feedlot performance, carcass characteristics, serum constituents and tissue elements of, lambs, 425
Growing-finishing
Combinations of peanut meal and blood meal as substitutes for soybean meal in corn-based, pig diets, 394
Influence of dietary fiber on the performance and cellulase activity of, swine, 388
Growing-finishing swine
Efficacy of nosiheptide as a growth promotant for, —A cooperative study, 1125
Growing swine

Effects of fiber and virginiamycin on nutrient absorption, nutrient retention and rate of passage in, 400
Growth
An investigation of the effect of Hesperidin Complex and Lemon Bioflavonoid Complex on, and development of Thoroughbred horses, 1529
Composition of, in mice with a major gene for rapid postweaning gain, 361
Effect of protein deficiency on, and plasma zinc concentration in genetically lean and obese swine, 710
Effects of feeding pattern and dietary regimen on, and adipose tissue cellularity in polygenic obese mice, 350
Effects of maternal streptozotocin-diabetes on fetal, energy reserves and body composition of newborn pigs, 974
Effects of seleniferous grains and inorganic selenium on tissue and blood composition and, performance of rats and swine, 725
Efficacy of thiopeptin as a, promotant for growing barrows and gilts—A cooperative study, 892
Endocrine regulation of fetal and postnatal meat animal, 511
Evaluation of a role for prolactin in, and the photoperiod-induced growth response in sheep, 86
Follicular, and production of estrogen and progesterone after injection of gilts with human chorionic gonadotropin on day 12 of the estrus cycle, 1295
Forage composition and, and physiological characteristics of cattle grazing several varieties of tall fescue during summer conditions, 584
Insulin binding to liver microsomes from lean and obese swine during, to market weight, 650
N^{τ}-methylhistidine excretion and muscle protein degradation in growing beef steers, 1262
Patterns of Angus, Charolais, Charolais × Angus and Holstein × Angus cows from birth to maturity, 957
Patterns of Angus, Hereford and Shorthorn cattle.
I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
II. Relationship of growth patterns of dams with progeny performance, 1205
Prenatal and postnatal effects in mouse lines selected for body weight and litter size: Performance of postnatal dams and, of progeny, 896
Selection for rate and for efficiency of lean, in rats: Net life-cycle efficiency, 49
Sex differences in plasma cortisol and, in the bovine, 376
The effect of parenteral use of estradiol, progesterone, testosterone and trenbolone on, and carcass composition in pigs, 1501
Growth promotant
Efficacy of nosiheptide as a, for growing-finishing swine—A cooperative study, 1125
Growth traits
Sire × environment interactions for, of Hereford cattle, 1467

H

Halothane sensitivity
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and, and economic traits in a superior and an inferior selection line of Swiss Landrace pigs, 1440
Haplotype
Breed and swine lymphocyte antigen, differences in agglutination titers following vaccination with B. bronchiseptica, 643
Hay
Effect of elemental sulfur supplementation on digestibility and metabolism of early vegetative and fall-accumulated regrowth fescue, by wethers, 1100
Heat stress
Lack of peripheral sympathetic control of uterine blood flow during acute, 182
Heifers
Absorption, excretion and tissue residue in feedlot, injected with the synthetic prostaglandin, fenprostalene, 164
Hemoglobin
Role of uteroferrin in placental iron transport: Effect of maternal iron treatment on fetal iron and uteroferrin content and neonatal, 1303
Hereford
Growth patterns of Angus, and Shorthorn cattle.
I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
II. Relationship of growth patterns of dams with progeny performance, 1205
Sire × environment interactions for growth traits of, cattle, 1467
Testicular development, epididymal sperm reserves and seminal quality in two-year-old, and Angus bulls: Effects of two levels of dietary energy, 432
Hereford bulls
The effects of sexual stimulation on the sexual performance of, 294
Hesperidin Complex
An investigation of the effect of, and Lemon Bioflavonoid Complex on growth and development of Thoroughbred horses, 1529
Heterogeneity
Of variance in randomized block experiments, 1339
Heritability
Preweaning survival in swine:, of direct and maternal effects, 346
Heritability estimates
For ages at farrowing, rebreeding interval and litter traits in swine, 67
Heterosis
Characterization of cattle of a five breed diallel. V. Breed and, effects on carcass merit, 922
High moisture
Effect of, and dry ammoniation of wheat straw on its feeding value for lambs, 559
Holstein × Angus

Growth patterns of Angus, Charolais, Charolais X Angus and, cows from birth to maturity, 957
Hormonal responses
To high and low planes of nutrition in weanling Thoroughbreds, 658
Hormone secretion
The influence of photoperiod on body weight gain, body composition, nutrient intake and, 1610
Hormones
Manipulation of endogenous and exogenous, for red meat production, 1621
Horses
An investigation of the effect of Hesperidin Complex and Lemon Bioflavonoid Complex on growth and development of Thoroughbred, 1529
Controls of feeding in, 1354
Human chorionic gonadotropin
Follicular growth and production of estrogen and progesterone after injection of gilts with, on day 12 of the estrous cycle, 1295
Hybrids
Effects of processing (grinding versus rolling) of normal and mutant corn, on performance of growing pigs, 875

I

Immunization
Active, of prepubertal colts against estrogens: Hormonal and testicular responses after puberty, 189
Immunoglobulin G_1
Inheritance of maternal, concentration by the bovine neonate, 39
Immunosuppressive effect
Of uterine secretory protein from Angus and Brahman cows upon lymphocytes in vitro, 1047
Inbreeding
Growth patterns of Angus, Hereford and Shorthorn cattle.
I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of, and reproductive performance, 1194
Selection and concurrent, in simulated beef herds: Model development, 1488
Indigestible particles
Influence of specific gravity on rumination and passage of, 470
Indomethacin
Ability of, to alter prostaglandin metabolite concentrations and to enhance the function of corpora lutea induced in postpartum suckled beef cows, 177
Information for contributors, 1401
Ingestion
The role of the rat in research on control of,: A commentary and review of recent advances in understanding brain control of feed intake, 1373
Ingestive behavior
Aspects of, in cattle, 1369
Inositol
As a lipotropic agent in dairy cattle diets, 806
Insulin
Receptor-dependent and independent degradation of, by isolated swine adipocytes at 37 C, 366
Insulin binding
To liver microsomes from lean and obese swine during growth to market weight, 650
Intake
Nutrient, and efficiency of calf production by two-breed cross cows, 317
Nutritive value of warm-season grass hays for beef cattle and sheep; Digestibility, and mineral utilization, 1582
Interaction
Genetic, environmental and, effects on lifetime production efficiency of crossbred ewes, 594
Interactions
Sire X environment, for growth traits of Hereford cattle, 1467
Intramuscular collagen
Thermal shrinkage temperature of, of bulls and steers, 706
Intravenous infusion
The effects of intestinal Escherichia coli 263, of Escherichia coli 263 culture filtrate and iron dextran supplementation on iron metabolism in the young pig, 1519
In vitro
Development of methods to measure activity of polysomes and cytoplasmic enzymes from bovine skeletal muscle in, protein-synthesis assays, 666
Development of porcine embryos in coculture with endometrial cell monolayers or culture supernatants, 1657
Effects of various methane inhibitors on the fermentation of amino acids by mixed rumen microorganisms, 1329
Immunosuppressive effect of uterine secretory protein from Angus and Brahman cows upon lymphocytes, 1047
Influence of photoperiod and prolactin on body composition and, lipid metabolism in wether lambs, 95
In vivo
Body composition estimation in nongravid and reproducing first-litter sows with deuterium oxide, 1239
Ionophore drugs
Potential interactions of, with divalent cations and their function in the animal body, 845
Iron
Role of uteroferrin in placental, transport: Effect of maternal iron treatment on fetal iron and uteroferrin content and neonatal hemoglobin, 1303
Iron dextran
The effects of intestinal Escherichia coli 263, intravenous infusion of Escherichia coli 263 culture filtrate and, supplementation on iron metabolism in the young pig, 1519
Iron metabolism
The effects of intestinal Escherichia coli 263, intravenous infusion of Escherichia coli 263 culture filtrate and iron dextran supplementation on, in the young pig, 1519

K

Kinetics
Comparative digestion, rumen fermentation and, of forage diets by steers and wethers, 237

L

Labile magnesium reserves
In beef cows subjected to different prepasture supplementation regimens, 197
Labor, duration of
Effects of dam age, prepartum nutrition and, on productivity and postpartum reproduction in beef females, 1
Lactation
A review of endocrine regulation of metabolism during, 498
Effects of concurrent, and postpartum mating on reproductive performance in mice selected for large litter size, 1224
Isolation of lactoferrin and its concentration in sows' colostrum and milk during a 21-day, 1080
Lactoferrin
Isolation of, and its concentration in sows' colostrum and milk during 21-day lactation, 1080
Lamb
Protein supplementation of ammoniated roughages. I. Corncobs supplemented with a blood meal-corn gluten meal mixture —, studies, 1601
Lamb production
Breed and sire effects on crossbred, from Panama ewes and on spermatozoan midpiece length, 29
Lambs
Effect of high moisture and dry ammoniation of wheat straw on its feeding value for, 559
Effects of dietary sewage solids on feedlot performance, carcass characteristics, serum constituents and tissue elements of growing, 425
Fostering, by odor transfer: The substitution experiment, 301
Influence of limestone level in high concentrate and high roughage diets on site and extent of digestion in, 217
Influence of photoperiod and prolactin on body composition and in vitro lipid metabolism in wether, 95
Relationship between LH and testicular development in progesterone-implanted prepubertal ram, 441
Response of growing, to clinoptilolite or zeolite NaA added to corn, corn-fish meal and corn-soybean meal diets, 1320
The effect of castration, estradiol and LHRH on LH secretion of, fed different levels of dietary energy, 460
Use of a β-adrenergic agonist to alter muscle and fat deposition in, 1256
Lambs, ewe
Fertility of, maintained indoors year-round on an accelerated breeding program, 1129
Lean
Effect of protein deficiency on growth and plasma zinc concentration in genetically, and obese swine, 710
Insulin binding to liver microsomes from, and obese swine during growth to market weight, 650
Lean cuts
Comparing prediction equations to estimate, in swine, 1270
Lean quantity
Prediction equations for estimating, in 15- to 50-kg pigs, 991
Lemon Bioflavonoid Complex
An investigation of the effect of Hesperidin Complex and, on growth and development of Thoroughbred horses, 1529
Leucine
Cytoplasmic and nuclear estrogen receptors and, incorporation in endometrium of cyclic and pregnant pigs to day 19 postestrus, 1286
LH
Relationship between, and testicular development in progesterone-implanted prepubertal ram lambs, 441
The effect of castration, estradiol and LHRH on, secretion of lambs fed different levels of dietary energy, 460
LHRH
Effects of a single injection of, on the response of anestrous ewes to the introduction of rams, 227
The effect of castration, estradiol and, on LH secretion of lambs fed different levels of dietary energy, 460
Life-cycle efficiency
Selection for rate and for efficiency of lean growth in rats: Net, 49
Lifetime ewe production
Phenotypic relationships among early life traits and, efficiency, 607
Lifetime production
The effect of selection in retrospect on, efficiency in sheep, 620
Lifetime production efficiency
Genetic, environmental and interaction effects on, of crossbred ewes, 594
Lifetime productivity
Of purebred and crossbred cows of Angus and Milking Shorthorn parentage: Weights and scores, 1451
Lighting
Type and intensity effects on beef carcass grade factors, 105
Limestone
Effects of additional, of various types on feedlot performance of beef cattle fed high corn diets differing in processing method and potassium level, 791
Influence of, level in high concentrate and high roughage diets on site and extent of digestion in lambs, 217
Linear index selection
To improve traits defined as ratios, 1185
Lipotropic agent
Inositol as a, in dairy cattle diets, 806
Litter
Effects of concurrent lactation and postpartum mating on reproductive performance in mice selected for large, size, 1224
Estimates of additive genetic, maternal and specific

combining abilities for some, traits of swine, 1140
Litter separation
Influence of reduced litter size and daily, on fertility of sows at 2 to 5 weeks postpartum, 284
Litter size
Direct and maternal genetic differences between lines of mice selected for body weight and,: Traits of dams, 630
Direct and maternal genetic differences between lines of mice selected for body weight and,: Traits of offspring, 908
Influence of reduced, and daily litter separation on fertility of sows at 2 to 5 weeks postpartum, 284
Prenatal and postnatal effects in mouse lines selected for body weight and,: Performance of postnatal dams and growth of progeny, 896
Litter traits
Heritability estimates for ages at farrowing, rebreeding interval and, in swine, 67
Litter variation
Between and within, sex effects and trends in sire and dam transmitting abilities of performance tested pigs in Ontario, 338
Litters
Response of sows and, to added dietary biotin in environmentally regulated facilities, 151
Sow productivity comparisons for four breeds of swine: Purebred and crossbred, 941
Liver microsomes
Insulin binding to, from lean and obese swine during growth to market weight, 650
Luteal responsiveness
Maintenance of the corpus luteum of early pregnancy in the ewe.
III. Differences between pregnant and nonpregnant ewes in, to prostaglandin $F_2\alpha$, 746
Lymphocyte
Breed and swine, antigen haplotype differences in agglutination titers following vaccination with B. bronchiseptica, 643
Shipping suppresses, blastogenic responses in Angus and Brahman X Angus feeder calves, 576
Lymphocytes
Immunosuppressive effect of uterine secretory protein from Angus and Brahman cows upon, in vitro, 1047
Lysine
Chemical composition and protein quality evaluation of high, barleys fed to growing rats and pigs, 1011
Effects of graded levels of, and excess arginine and threonine on young pigs fed practical diets, 135

M

Magnesium
Influence of aluminum as sulfate, chloride and citrate on, and calcium metabolism in sheep, 798
Labile, reserves in beef cows subjected to different prepasture supplementation regimens, 197
Magnesium sulfate
Effects of, supplementation and fertilization on quality and mineral utilization of timothy hays by sheep, 1403
Market weight
Insulin binding to liver microsomes from lean and obese swine during growth to, 650
Maternal
Effect of, diet on skeletal muscle composition and metabolism and on bone dimensions and composition of the fetal pig, 1003
Effects of, streptozotocin-diabetes on fetal growth, energy reserves and body composition of newborn pigs, 974
Estimates of additive genetic, and specific combining abilities for some litter traits of swine, 1140
Inheritance of, immunoglobulin G_1 concentration by the bovine neonate, 39
Role of uteroferrin in placental iron transport: Effect of, iron treatment on fetal iron and uteroferrin content and neonatal hemoglobin, 1303
Mathematical modeling
Of alternative selection strategies for beef production, 308
Mating
Effects of concurrent lactation and postpartum, on reproductive performance in mice selected for large litter size, 1224
Matings
Sire breed effects in, with Angus cows:
I. Fertility, calf survival and performance to 18 months, 11
II. Carcass characteristics of steer progeny, 23
Maturity
Growth patterns of Angus, Charolais, Charolais X Angus and Holstein X Angus cows from birth to, 957
Meat
Endocrine regulation of fetal and postnatal, animal growth, 511
Meat palatability
Castration and sire effects on carcass traits, and muscle fiber characteristics in Angus cattle, 981
Meat production, red
Manipulation of endogenous and exogenous hormones for, 1621
Memorials
Robert M. Melampy, 1106
Horace Wakeland "Tod" Norton, 269
Metabolism
A review of endocrine regulation of, during lactation, 498
Effect of elemental sulfur supplementation on digestibility and, of early vegetative and fall-accumulated regrowth fescue hay by wethers, 1100
Effect of maternal diet on skeletal muscle composition and, and on bone dimensions and composition of the fetal pig, 1003
Influence of aluminum as sulfate, chloride and citrate on magnesium and calcium, in sheep, 798
The effects of intestinal Escherichia coli 263, intravenous infusion of Escherichia coli 263

culture filtrate and iron dextran supplementation on iron, in the young pig, 1519
The use of genetic concepts and variation in the study of, 490
Methane inhibitors
Effects of various, on the fermentation of amino acids by mixed rumen microorganisms in vitro, 1329
Methods
Development of, to measure activity of polysomes and cytoplasmic enzymes from bovine skeletal muscle in in vitro protein-synthesis assays, 666
Mice
Composition of growth in, with a major gene for rapid postweaning gain, 361
Direct and maternal genetic differences between lines of, selected for body weight and litter size: Traits of dams, 630
Direct and maternal genetic differences between lines of, selected for body weight and litter size: Traits of offspring, 908
Effects of concurrent lactation and postpartum mating on reproductive performance in, selected for large litter size, 1224
Effects of feeding pattern and dietary regimen on growth and adipose tissue cellularity in polygenic obese, 350
Microorganisms
Effects of various methane inhibitors on the fermentation of amino acids by mixed rumen, in vitro, 1329
Microsomes
Insulin binding to liver, from lean and obese swine during growth to market weight, 650
Migration
Characteristics of bovine spermatozoa after, through a bovine serum albumin gradient, 454
Milk
Effects of long-term consumption of sewage solids on blood, and tissue elemental composition of breeding ewes, 416
Isolation of lactoferrin and its concentration in sows' colostrum and, during 21-day lactation, 1080
Yield and composition of, and weight gain of nursing pigs from sows fed diets containing fructose or dextrose, 141
Milk yield
Environmental and genetic variation in, of native cattle and crosses with Brown Swiss in India, 74
Milking Shorthorn
Lifetime productivity of purebred and crossbred cows of Angus and, parentage: Weights and scores, 1451
Mineral
Introductory remarks for the symposium on newer findings in vitamin and, nutrition, 805
Mineral utilization
Effects of magnesium sulfate supplementation and fertilization on quality and, of timothy hays by sheep, 1403
Nutritive value of warm-season grass hays for beef cattle and sheep; Digestibility, intake and, 1582
Minutes of the 76th Annual Business Meeting, 1688
Mixed model
Sire evaluation with dairy cattle – Experience and genetic gain, 529
Model development
Selection and concurrent inbreeding in simulated beef herds:, 1488
Molybdenum
Influence of, and sulfate supplementation and withdrawal of diets containing high copper broiler litter on tissue copper levels in ewes, 210
Morphology
Ovarian and uterine, and function in Angus and Brahman cows, 1026
Mounting activity
The influence of the stage of the estrous cycle and novel cows upon, of dairy cattle, 1430
Mouse lines
Prenatal and postnatal effects in, selected for body weight and litter size: Performance of postnatal dams and growth of progeny, 896
Muscle
Development of methods to measure activity of polysomes and cytoplasmic enzymes from bovine skeletal, in in vitro protein-synthesis assays, 666
Relative roles of polysomes and cytoplasmic enzymes in regulating bovine skeletal, protein synthesis, 684
The contribution of proteolytic enzymes to postmortem changes in, 1644
Use of a β-adrenergic agonist to alter, and fat deposition in lambs, 1256
Use of a β-agonist to alter fat and, deposition in steers, 1247
Muscle fiber
Castration and sire effects on carcass traits, meat palatability and, characteristics in Angus cattle, 981
Muscle glycogen
Bovine, as affected by fasting and refeeding, 384
Muscle protein
Growth, N^{τ}-methylhistidine excretion and, degradation in growing beef steers, 1262
Myofiber
Differentiation in skeletal muscles of newborn runt and normal weight pigs, 1651

N

Neonatal
Role of uteroferrin in placental iron transport: Effect of maternal iron treatment on fetal iron and uteroferrin content and, hemoglobin, 1303
Neonate
Inheritance of maternal immunoglobulin G_1 concentration by the bovine, 39
Newborn pigs
Effects of maternal streptozotocin-diabetes on fetal growth, energy reserves and body composition of, pigs, 974
Myofiber differentiation in skeletal muscles of, runt and normal weight pigs, 1651
News and Notes
270, 550, 854, 1108, 1381, 1734

Niacin
Thiamin and, in the rumen, 813
Nickel
As a "Newer Trace Element" in the nutrition of domestic animals, 823
Nitrogen
Effects of level of feed intake on, amino acid and energy digestibilities measured at the end of the small intestine and over the total digestive tract of growing pigs, 717
3-Nitro-4-hydroxyphenylarsonic acid
Effect of, on copper utilization by the pig, rat and chick, 997
N^{τ}-methylhistidine
Growth, excretion and muscle protein degradation in growing beef steers, 1262
Nongravid
In vivo body composition estimation in, and reproducing first-litter sows with deuterium oxide, 1239
Noninbred
Growth patterns of Angus, Hereford and Shorthorn cattle.
I. Comparison of inbred and, lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
Nosiheptide
Efficacy of, as a growth promotant for growing-finishing swine – A cooperative study, 1125
Nuclear estrogen receptors
Cytoplasmic and, and leucine incorporation in endometrium of cyclic and pregnant pigs to day 19 postestrus, 1286
Nutrient absorption
Effects of fiber and virginiamycin on, nutrient retention and rate of passage in growing swine, 400
Nutrient intake
And efficiency of calf production by two-breed cross cows, 317
The influence of photoperiod on body weight gain, body composition, and hormone secretion, 1610
Nutrient retention
Effects of fiber and virginiamycin on nutrient absorption, and rate of passage in growing swine, 400
Nutrient uptake
Blood flow, steroid secretion and, of the gravid uterus during the periparturient period in sows, 1085
Nutrient utilization
Influence of dietary aluminum on, in ruminants, 836
Nutrition
Hormonal responses to high and low planes of, in weanling Thoroughbreds, 658
Introductory remarks for the symposium on newer findings in vitamin and mineral, 805
Nickel as a "Newer Trace Element" in the, of domestic animals, 823
Nutrition, prepartum
Effects of dam age, and duration of labor on productivity and postpartum reproduction in beef females, 1
Nutritive value
Of warm-season grass hays for beef cattle and sheep: Digestibility, intake and mineral utilization, 1582

O

Obese
Effect of protein deficiency on growth and plasma zinc concentration in genetically lean and, swine, 710
Effects of feeding pattern and dietary regimen on growth and adipose tissue cellularity in polygenic, mice, 350
Insulin binding to liver microsomes from lean and, swine during growth to market weight, 650
Odor transfer
Fostering lambs,: The substitution experiment, 301
Offspring
Direct and maternal genetic differences between lines of mice selected for body weight and litter size: Traits of, 908
Ovarian
And uterine morphology and function in Angus and Brahman cows, 1026
Ovarian compensation
Factors affecting, after unilateral ovariectomy in gilts, 170
Ovary
Production of estradiol by each, during the estrous cycle of cows, 764

P

Parturition
Influence of exposure to bulls on resumption of estrous cycles following, in beef cows, 1135
Passage, rate of
Effects of fiber and virginiamycin on nutrient absorption, nutrient retention and, in growing swine, 400
Peanut meal
Combinations of, and blood meal as substitutes for soybean meal in corn-based, growing-finishing pig diets, 394
Pen conditions
Energy utilization of weanling pigs raised under, 738
Performance
Effects of water flow restriction and environmental factors on, of nursery-age pigs, 1423
Genetic correlations of pig, and sow productivity traits, 1477
Influence of cow frame size and fatness on seasonal patterns of forage intake, and efficiency of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Influence of dietary fiber on the, and cellulase activity of growing-finishing swine, 388
Periparturient period
Blood flow, steroid secretion and nutrient uptake of the gravid uterus during the, in sows, 1085
Phenotypic relationships
Among early life traits and lifetime ewe production efficiency, 607
6-phosphogluconate dehydrogenase

Relationships between the H and A-O blood types, phosphohexose isomerase and, red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior selection line of Swiss Landrace pigs, 1440
Phosphohexose isomerase
Relationships between the H and A-O blood types, and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior selection line of Swiss Landrace pigs, 1440
Phosphorus
An evaluation of various biological characteristics in assessing low, intake in weanling swine, 1546
Effect of sand or soil as a dietary component on, utilization by sheep, 1092
Photoperiod
Evaluation of a role for prolactin in growth and the, -induced growth response in sheep, 86
Influence of, and prolactin on body composition and in vitro lipid metabolism in wether lambs, 95
The influence of, on body weight gain, body composition, nutrient intake and hormone secretion, 1610
Physiological characteristics
Forage composition and growth and, of cattle grazing several varieties of tall fescue during summer conditions, 584
Pig
Combinations of peanut meal and blood meal as substitutes for soybean meal in corn-based, growing-finishing, diets, 394
Comparative utilization of in-seed fats and the respective extracted fats by the young, 1557
Effect of maternal diet on skeletal muscle composition and metabolism and bone dimensions and composition of the fetal, 1003
Effect of 3-nitro-4-hydroxyphenylarsonic acid on copper utilization by the, rat and chick, 997
Genetic correlations of, performance and sow productivity traits, 1477
The effects of intestinal Escherichia coli 263, intravenous infusion of Escherichia coli 263 culture filtrate and iron dextran supplementation on iron metabolism in the young, 1519
Pigs
Between and within litter variation, sex effects and trends in sire and dam transmitting abilities of performance tested, in Ontario, 338
Chemical composition and protein quality evaluation of high lysine barleys fed to growing rats and, 1011
Controls of feeding in, 1345
Cytoplasmic and nuclear estrogen receptors and leucine incorporation in endometrium of cyclic and pregnant, to day 19 postestrus, 1286
Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on dry matter, energy, protein and amino acid digestibilities in cannulated, 1510
Effects of graded levels of lysine and excess agrinine and threonine on young, fed practical diets, 135
Effects of level of feed intake on nitrogen, amino acid and energy digestibilities measured at the end of the small intestine and over the total digestive tract of growing, 717
Effects of maternal streptozotocin-diabetes on fetal growth, energy reserves and body composition of newborn, 974
Effects of processing (grinding versus rolling) of normal and mutant corn hybrids on performance of growing, 875
Effects of source and particle size on the biological availability of calcium in calcium supplements for growing, 125
Effects of water flow restriction and environmental factors on performance of nursery-age, 1423
Energy utilization of weanling, raised under pen conditions, 738
Myofiber differentiation in skeletal muscles of newborn runt and normal weight, 1651
Prediction equations for estimating lean quantity in 15- to 50-kg, 991
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior selection line of Swiss Landrace, 1440
The effect of parenteral use of estradiol, progesterone, testosterone and trenbolone on growth and carcass composition in, 1501
Pigs, nursing
Yield and composition of milk and weight gain of, from sows fed diets containing fructose or dextrose, 141
Placement
272, 552, 856, 1110, 1735
Placental iron transport
Role of uteroferrin in,: Effect of maternal iron treatment on fetal iron and uteroferrin content and neonatal hemoglobin, 1303
Plasma cortisol
Sex differences in, and growth in the bovine, 376
Plasma zinc concentration
Effect of protein deficiency on growth and, in genetically lean and obese swine, 710
Polygenic obese mice
Effects of feeding pattern and dietary regimen on growth and adipose tissue cellularity in, 350
Polysomes
Development of methods to measure activity of, and cytoplasmic enzymes from bovine skeletal muscle in in vitro protein-synthesis assays, 666
Relative roles of, and cytoplasmic enzymes in regulating bovine skeletal muscle protein synthesis, 684
Populations
Estimation of genetic variances from unselected and selected, 1213
Porcine embryos
In vitro development of, in coculture with endometrial cell monolayers of culture supernatants, 1657
Pork quality
Effect of chilling method and electrical stimulation on, 697
Pork sausage
Update: Prevalence of Salmonella in, 122
Postestrus
Cytoplasmic and nuclear estrogen receptors and

leucine incorporation in endometrium of cyclic and pregnant pigs to day 19, 1286
Postmortem changes
The contribution of proteolytic enzymes to, in muscle, 1644
Postnatal
Endocrine regulation of fetal and, meat animal growth, 511
Prenatal and, effects in mouse lines selected for body weight and litter size: Performance of postnatal dams and growth of progeny, 896
Postpartum
Effects of concurrent lactation and, mating on reproductive performance in mice selected for large litter size, 1224
Influence of reduced litter size and daily litter separation on fertility of sows at 2 to 5 weeks, 284
Postweaning gain
Composition of growth in mice with a major gene for rapid, 361
Potassium
Effects of additional limestone of various types on feedlot performance of beef cattle fed high corn diets differing on processing method and, level, 791
Prediction equations
Comparing, to estimate lean cuts in swine, 1270
For estimating lean quantity in 15- to 50-kg pigs, 991
Pregnancy
Maintenance of the corpus luteum of early, in the ewe.
III. Differences between pregnant and nonpregnant ewes in luteal responsiveness to prostaglandin $F_2\alpha$, 746
Pregnancy rates
Improvement by ergonovine of sperm transport, fertilization and, in ewes in natural or prostaglandin-induced estrus, 754
Pregnant
Cytoplasmic and nuclear estrogen receptors and leucine incorporation in endometrium of cyclic and, pigs to day 19 postestrus, 1286
Prenatal
And postnatal effects in mouse lines selected for body weight and litter size: Performance of postnatal dams and growth of progeny, 896
Prepubertal colts
Active immunization of, against estrogens: Hormonal and testicular responses after puberty, 189
Prepubertal ram lambs
Relationship between LH and testicular development in progesterone-implanted, 441
President's address 1984, 1684
Preweaning survival
In swine: Heritability of direct and maternal effects, 346
Pricing
Establishing practical guidelines for, market swine, 883
Proceedings of the 76th annual meeting
Of the American Society of Animal Science, 1684
Processing
Effects of, (grinding versus rolling) of normal and mutant corn hybrids on performance of growing pigs, 875
Productivity
A genetic analysis of sow, traits, 1149
Effects of dam age, prepartum nutrition and duration of labor on, and postpartum reproduction in beef females, 1
Sow, comparisons for four breeds of swine: Purebred and crossbred litters, 941
Productivity traits
Genetic correlations of pig performance and sow, 1477
Profiles
Effects of dietary regimen and tissue site on bovine fatty acid, 109
Progeny
Prenatal and postnatal effects on mouse lines selected for body weight and litter size: Performance of postnatal dams and growth of, 896
Progeny performance
Growth patterns of Angus, Hereford and Shorthorn cattle.
II. Relationship of growth patterns of dams with, 1205
Progesterone
Follicular growth and production of estrogen and, after injection of gilts with human chorionic gonadotropin on day 12 of the estrous cycle, 1295
The effect of parenteral use of estradiol, testosterone and trenbolone on growth and carcass composition in pigs, 1501
Progesterone-implanted
Relationship between LH and testicular development in, prepubertal ram lambs, 441
Prolactin
Evaluation of a role for, in growth and the photoperiod-induced growth response in sheep, 86
Influence of photoperiod and, on body composition and in vitro lipid metabolism in wether lambs, 95
Prostaglandin
Ability of indomethacin to alter, metabolite concentrations and to enhance the function of corpora lutea induced in postpartum suckled beef cows, 177
Improvement by ergonovine of sperm transport, fertilization and pregnancy rates in ewes in natural or, -induced estrus, 754
Prostaglandin $F_2\alpha$
Maintenance of the corpus luteum of early pregnancy in the ewe.
III. Differences between pregnant and nonpregnant ewes in luteal responsiveness to, 746
Protein
Dark and yellow rapeseed hulls, soybean hulls and a purified fiber source: Their effects on dry matter, energy, and amino acid digestibilities in cannulated pigs, 1510
Growth, N^{τ}-methylhistidine excretion and muscle, degradation in growing beef steers, 1262
Protein deficiency
Effect of, on growth and plasma zinc concentration in genetically lean and obese swine, 710
Protein quality

Chemical composition and, evaluation of high lysine barleys fed to growing rats and pigs, 1011
Protein, soybean meal
Effect of alcohol treatments of soybean meal on ruminal escape of, 483
Protein supplementation
Of ammoniated roughages.
I. Corncobs supplemented with a blood meal-corn gluten meal mixture — Lamb studies, 1601
Protein synthesis
Relative roles of polysomes and cytoplasmic enzymes in regulating bovine skeletal muscle, 684
Protein-synthesis assays
Development of methods to measure activity of polysomes and cytoplasmic enzymes from bovine skeletal muscle in in vitro, 666
Proteolytic enzymes
The contribution of, to postmortem changes in muscle, 1644
Purebred
Lifetime productivity of, and crossbred cows of Angus and milking Shorthorn parentage: Weights and scores, 1451
Reproductive performance for four breeds of swine: Crossbred females and, and crossbred boars, 948
Sow productivity comparisons for four breeds of swine: , and crossbred litters, 941

Q

Quality
Effects of magnesium sulfate supplementation and fertilization on, and mineral utilization of timothy hays by sheep, 1403

R

Radiographic evaluation
Of bovine artificial inseminating technique among professional and herdsman-inseminators using .5- and .25-ml French straws, 1671
Ram lambs
Relationship between LH and testicular development in progesterone-implanted prepubertal, 441
Rams
Effects of a single injection of LHRH on the response of anestrous ewes to the introduction of, 277
Randomized block experiments
Heterogeneity of variance in, 1339
Rapeseed hulls
Dark and yellow, soybean hulls and a purified fiber source: Their effects on dry matter, energy, protein and amino acid digestibilities in cannulated pigs, 1510
Rat
Effect of 3-nitro-4-hydroxyphenylarsonic acid on copper utilization by the pig, and chick, 997
The role of the, in research on control of ingestion: A commentary and review of recent advances in understanding brain control of feed intake, 1373
Ratios
Linear index selection to improve traits defined as, 1185
Rats
Chemical composition and protein quality evaluation of high lysine barleys fed to growing, and pigs, 1011
Effects of seleniferous grains and inorganic selenium on tissue and blood composition and growth performance of, and swine, 725
Selection for rate and for efficiency of lean growth in,: Net life-cycle efficiency, 49
Rebreeding interval
Heritability estimates for ages at farrowing, and litter traits in swine, 67
Recursive prediction
Extension of a reduced animal model to, of breeding values, 1164
Reduced animal model
Extension of a, to recursive prediction of breeding values, 1164
Refeeding
Bovine muscle glycogen as affected by fasting and, 384
Repeated measures experiments
The analysis of, in endocrinology, 1070
Reports from representatives of the Society, 267, 1697
Reports of special committees, 1699
Reproducing
In vivo body composition estimation in nongravid and, first-litter sows with deuterium oxide, 1239
Reproduction, postpartum
Effects of dam age, prepartum nutrition and duration of labor on productivity and, in beef females, 1
Reproductive cycle
Serum folates during the, of sows, 158
Reproductive performance
Effects of concurrent lactation and postpartum mating on, in mice selected for large litter size, 1224
For four breeds of swine: Crossbred females and purebred and crossbred boars, 948
Growth patterns of Angus, Hereford and Shorthorn cattle.
I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and, 1194
Reproductive performances
Folic acid and, of sows, 1020
Responses, hormonal and testicular
Active immunization of prepubertal colts against estrogens:, after puberty, 189
Riboflavin
Requirement of gestating swine, 1567
Roughage-based cattle diets
Effect of selected dietary buffers upon utilization of concentrate- or,: Laboratory studies, 227
Effect of sodium bicarbonate and tetrasodium pyrophosphate upon utilization of concentrate- and,: Cattle studies, 1309
Roughage diets
Influence of limestone level in high concentrate and high, on site and extent of digestion in

lambs, 217
Rumen
Effects of various methane inhibitors on the fermentation of amino acids by mixed, microorganisms in vitro, 1329
Influence of dietary protein and energy in disappearance of dry matter and from different forage types from Dacron bags suspended in the, 246
Influence of supplementation of corn stover with corn grain on the fibrolytic bacteria in the, of sheep and their relation to the intake and digestion of fiber, 772
Thiamin and niacin in the, 813
Rumen bacteria
Cyanogenesis in bovine rumen fluid and pure cultures of, 784
Rumen fermentation
Comparative digestion, and kinetics of forage diets by steers and wethers, 237
Rumen fluid
Cyanogenesis in bovine, and pure cultures of rumen bacteria, 784
Ruminal escape
Effect of alcohol treatments of soybean meal on, of soybean meal protein, 483
Ruminants
Influence of dietary aluminum on nutrient utilization in, 836
Rumination
Influence of specific gravity on, and passage of indigestible particles, 470

S

Salmonella
Update: Prevalence of, in pork sausage, 122
Salt-mineral mixtures
Effect of calcium phosphates and zinc in, on ad libitum salt-mix intake and on zinc and selenium status of sheep, 1594
Salt-mix intake, ad libitum
Effect of calcium phosphates and zinc in salt-mineral mixtures on, and on zinc and selenium status of sheep, 1594
Sand
Effect of, or soil as a dietary component on phosphorus utilization by sheep, 1092
Scores
Lifetime productivity of purebred and crossbred cows of Angus and Milking Shorthorn parentage: Weights and, 1451
Seasonal patterns
Influence of cow frame size and fatness on, of forage intake, performance and efficiency of Angus cow-calf pairs grazing fescue-legume or fescue pastures, 1411
Selection
The effect of, in retrospect on lifetime production efficiency in sheep, 620
Selection line
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior, of Swiss Landrace pigs, 1440
Seleniferous grains
Effects of, and inorganic selenium on tissue and blood composition and growth performance of rats and swine, 725
Selenium
Effect of calcium phosphates and zinc in salt-mineral mixtures on ad libitum salt-mix intake and on zinc and, status of sheep, 1594
Toxic effects of, on growing swine fed corn-soybean meal diets, 733
Selenium, inorganic
Effects of seleniferous grains and, on tissue and blood composition and growth performance of rats and swine, 725
Seminal quality
Testicular development, epididymal sperm reserves and, in two-year-old Hereford and Angus bulls: Effects of two levels of dietary energy, 432
Serum albumin
Characteristics of bovine spermatozoa after migration through a bovine, gradient, 454
Serum constituents
Effects of dietary sewage solids on feedlot performance, carcass characteristics, and tissue elements of growing lambs, 425
Serum folates
During the reproductive cycle of sows, 158
Sewage solids
Effects of dietary, on feedlot performance, carcass characteristics, serum constituents and tissue elements of growing lambs, 425
Effects of long-term consumption of, on blood, milk and tissue elemental composition of breeding ewes, 416
Sex differences
In plasma cortisol and growth in the bovine, 376
Sex effects
Between and within litter variation, and trends in sire and dam transmitting abilities of performance tested pigs in Ontario, 338
Sexual performance
The effects of sexual stimulation on the, of Hereford bulls, 294
Sexual stimulation
The effects of, on the sexual performance of Hereford bulls, 294
Sheep
A silicone esophageal cannula: Its surgical installation and use in research with grazing cattle, or goats, 204
Control of feed intake in, 1362
Effect of calcium phosphates and zinc in salt-mineral mixtures on ad libitum salt-mix intake and on zinc and selenium status of, 1594
Effect of sand or soil as a dietary component on phosphorus utilization by, 1092
Effects of magnesium sulfate supplementation and fertilization on quality and mineral utilization of timothy hays by, 1403
Evaluation of a role for prolactin in growth and the photoperiod-induced growth response in, 86
Influence of aluminum as sulfate, chloride and citrate on magnesium and calcium metabolism in, 798
Influence of supplementation of corn stover with

corn grain on the fibrolytic bacteria in the rumen of, and their relation to the intake and digestion of fiber, 772
Nutritive value of warm-season grass hays for beef cattle and,: Digestibility, intake and mineral utilization, 1582
The effect of selection in retrospect on lifetime production efficiency in, 620
Shorthorn
Growth patterns of Angus, Hereford and, cattle. I. Comparison of inbred and noninbred lines, changes in patterns over time and effects of level of inbreeding and reproductive performance, 1194
II. Relationship of growth patterns of dams with progeny performance, 1205
Silicone esophageal cannula
A,: Its surgical installation and use in research with grazing cattle, sheep or goats, 204
Simulated beef herds
Selection and concurrent inbreeding in,: Model development, 1488
Sire
Between and within litter variation, sex effects and trends in, and dam transmitting abilities of performance tested pigs in Ontario, 338
Breed and, effects on crossbred lamb production from Panama ewes and on spermatozoan midpiece length, 29
Castration and, effects on carcass traits, meat palatability and muscle fiber characteristics in Angus cattle, 981
Mixed model, evaluation with dairy cattle — Experience and genetic gain, 529
Skeletal muscle
Development of methods to measure activity of polysomes and cytoplasmic enzymes from bovine, in in vitro protein-synthesis assays, 666
Effect of maternal diet on, composition and metabolism and on bone dimensions and composition of the fetal pig, 1003
Relative roles of polysomes and cytoplasmic enzymes in regulating bovine, protein synthesis, 684
Skeletal muscles
Myofiber differentiation in, of newborn runt and normal weight pigs, 1651
Small intestine
Effects of level of feed intake on nitrogen, amino acid and energy digestibilities measured at the end of the, and over the total digestive tract of growing pigs, 717
Sodium bicarbonate
Effect of, and tetrasodium pyrophosphate upon utilization of concentrate- and roughage-based cattle diets: Cattle studies, 1309
Soil
Effect of sand or, as a dietary component on phosphorus utilization by sheep, 1092
Sow
A genetic analysis of, productivity traits, 1149
Genetic correlations of pig performance and, productivity traits, 1477
Productivity comparisons for four breeds of swine: Purebred and crossbred litters, 941
Sows
Blood flow, steroid secretion and nutrient uptake of the gravid uterus during the periparturient period in, 1085
Estimating milk yield of, 1281
Folic acid and reproductive performances of, 1020
Influence of reduced litter size and daily litter separation on fertility of, at 2 to 5 weeks postpartum, 284
In vivo body composition estimation in nongravid and reproducing first-litter, with deuterium oxide, 1239
Isolation of lactoferrin and its concentration in, colostrum and milk during a 21-day lactation, 1080
Response of, and litters to added dietary biotin in environmentally regulated facilities, 151
Serum folates during the reproductive cycle of, 158
Yield and composition of milk and weight gain of nursing pigs from, fed diets containing fructose or dextrose, 141
Soybean hulls
Dark and yellow rapeseed hulls, and a purified fiber source: Their effects on dry matter, energy, protein and amino acid digestibilities in cannulated pigs, 1510
Soybean meal
Amino acid availability and urea recycling in finishing swine fed barley-based diets supplemented with, or sunflower meal, 409
Combinations of peanut meal and blood meal as substitutes for, in corn-based, growing-finishing pig diets, 394
Effect of alcohol treatments of, on ruminal escape of soybean meal protein, 483
Specific combining abilities
Estimates of additive genetic, maternal and, for some litter traits of swine, 1140
Specific gravity
Influence of, on rumination and passage of indigestible particles, 470
Spermatozoa
Characteristics of bovine, after migration through a bovine serum albumin gradient, 454
Spermatozoan midpiece
Breed and sire effects on crossbred lamb production from Panama ewes and on, length, 29
Sperm reserves
Testicular development, epididymal, and seminal quality in two-year-old Hereford and Angus bulls: Effects of two levels of dietary energy, 432
Sperm transport
Improvement by ergonovine of, fertilization and pregnancy rates in ewes in natural or prostaglandin-induced estrus, 754
Steer progeny
Sire breed effects in mating with Angus cows: II. Carcass characteristics of, 23
Steers
Comparative digestion, rumen fermentation and kinetics of forage diets by, and wethers, 237
Growth, N^{τ}-methylhistidine excretion and muscle protein degradation in growing beef, 1262
Thermal shrinkage temperature of intramuscular collagen of bulls and, 706
Use of a β-agonist to alter fat and muscle deposition in, 1247.

Steroid secretion
Blood flow, and nutrient uptake of the gravid uterus during the periparturient period in sows, 1085
Streptozotocin-diabetes
Effects of maternal, on fetal growth, energy reserves and body composition of newborn pigs, 974
Style and form, 1390
Substitutes
Combinations of peanut meal and blood meal as, for soybean meal in corn-based, growing-finishing pig diets, 394
Suckled beef cows
Ability of indomethacin to alter prostaglandin metabolite concentrations and to enhance the function of corpora lutea induced in postpartum, 177
Sulfate
Influence of aluminum as, chloride and citrate on magnesium and calcium metabolism in sheep, 798
Influence of molybdenum and, supplementation and withdrawal of diets containing high copper broiler litter on tissue copper levels in ewes, 210
Sulfur
Arsenic-, amino acid interactions in the chick, 1573
Effect of elemental, supplementation on digestibility and metabolism of early vegetative and fall-accumulated regrowth fescue hay by wethers, 1100
Summer
Forage composition and growth and physiological characteristics of cattle grazing several varieties of tall fescue during, conditions, 584
Sunflower meal
Amino acid availability and urea recycling in finishing swine fed barley-based diets supplemented with soybean meal or, 409
Swine
Amino acid availability and urea recycling in finishing, fed barley-based diets supplemented with soybean meal or sunflower meal, 409
An evaluation of various biological characteristics in assessing low phosphorus intake in weanling, 1546
Breed and, lymphocyte antigen haplotype differences in agglutination titers following vaccination with B. bronchiseptica, 643
Comparing prediction equations to estimate lean cuts in, 1270
Effect of protein deficiency on growth and plasma zinc concentration in genetically lean and obese, 710
Effects of fiber and virginiamycin on nutrient absorption, nutrient retention and rate of passage in growing, 400
Effects of seleniferous grains and inorganic selenium on tissue and blood composition and growth performance of rats and, 725
Effects of zeolite A or chlinoptilolite in diets of growing, 1536
Efficacy of furazolidone in grower diets on subsequent performance of, – A cooperative study, 863
Efficacy of nosiheptide as a growth promotant for growing-finishing, – A cooperative study, 1125
Efficacy of using vaginal conductivity as an indicator of the optimum time to breed in, 869
Establishing practical guidelines for pricing market, 883
Estimates of additive genetic, maternal and specific combining abilities for some litter traits of, 1140
Genetic parameters for testes traits in, 967
Heritability estimates for ages at farrowing, rebreeding interval and litter traits in, 67
Influence of dietary fiber on the performance and cellulase activity of growing-finishing, 388
Insulin binding to liver microsomes from lean and obese, during growth to market weight, 650
Preweaning survival in,: Heritability of direct and maternal effects, 346
Receptor-dependent and independent degradation of insulin by isolated swine adipocytes at 37 C, 366
Reproductive performance for four breeds of,: Crossbred females and purebred and crossbred boars, 948
Sow productivity comparisons for four breeds of,: Purebred and crossbred litters, 941
Toxic effects of selenium on growing, fed corn-soybean meal diets, 733
Swine, gestating
Riboflavin requirement of, 1567
Swiss Landrace pigs
Relationships between the H and A-O blood types, phosphohexose isomerase and 6-phosphogluconate dehydrogenase red cell enzyme systems and halothane sensitivity, and economic traits in a superior and an inferior selection line of, 1440
Sympathetic control
Lack of peripheral, of uterine blood flow during acute heat stress, 182
Synthetic prostaglandin
Absorption, excretion and tissue residue in feedlot heifers injected with the, fenprostalene, 164

T

Tall fescue
Forage composition and growth and physiological characteristics of cattle grazing several varieties of, during summer conditions, 584
Teaching
Philosophies of, and approaches to teaching, 542
Teat
Evidence against chronic, stimulation as an autonomous effector of diminished gonadotropin release in beef cows, 1060
Testes
Genetic parameters for, traits in swine, 967
Testicular development
Epididymal sperm reserves and seminal quality in two-year-old Hereford and Angus bulls: Effects of two levels of dietary energy, 432
Relationship between LH and, in progesterone-implanted prepubertal ram lambs, 441

Testosterone
The effect of parenteral use of estradiol, progesterone, and trenbolone on growth and carcass composition in pigs, 1501
Tetrasodium pyrophosphate
Effect of sodium bicarbonate and, upon utilization of concentrate- and roughage-based cattle diets: Cattle studies, 1309
Thermal shrinkage temperature
Of intramuscular collagen of bulls and steers, 706
Thiamin
And niacin in the rumen, 813
Thiopeptin
Efficacy of, as a growth promotant for growing barrows and gilts – A cooperative study, 892
Thoroughbred horses
An investigation of the effect of Hesperidin Complex and Lemon Bioflavonoid Complex on growth and development of, 1529
Thoroughbreds
Hormonal responses to high and low planes of nutrition in weanling, 658
Threonine
Effects of graded levels of lysine and excess arginine and, on young pigs fed practical diets, 135
Timothy hays
Effects of magnesium sulfate supplementation and fertilization on quality and mineral utilization of, by sheep, 1403
Tissue
Effects of seleniferous grains and inorganic selenium on, and blood composition and growth performance of rats and swine, 725
Tissue copper levels
Influence of molybdenum and sulfate supplementation and withdrawal of diets containing high copper broiler litter on, in ewes, 210
Tissue elemental composition
Effects of long-term consumption of sewage solids on blood, milk and, of breeding ewes, 416
Tissue elements
Effects of dietary sewage solids on feedlot performance, carcass characteristics, serum constituents and, of growing lambs, 425
Tissue residue
Absorption, excretion and, in feedlot heifers injected with the synthetic prostaglandin, fenprostalene, 164
Tissue site
Effects of dietary regimen and, on bovine fatty acid profiles, 109
Toxic effects
Of selenium on growing swine fed corn-soybean meal diets, 733
Traits
A genetic analysis of sow productivity, 1149
Direct and maternal genetic differences between lines of mice selected for body weight and litter size: , of offspring, 908
Estimates of additive genetic, maternal and specific combining abilities for some litter, of swine, 1140
Linear index selection to improve, defined as ratios, 1185
Relationships between, of cow-calf pairs and a measure of partial efficiency, 1176
Trenbolone
The effect of parenteral use of estradiol, progesterone, testosterone and, on growth and carcass composition in pigs, 1501

U

Unilateral ovariectomy
Factors affecting ovarian compensation after, in gilts, 170
Urea recycling
Amino acid availability and, in finishing swine fed barley-based diets supplemented with soybean meal or sunflower meal, 409
Uterine
Ovarian and, morphology and function in Angus and Brahman cows, 1026
Uterine blood flow
Lack of peripheral sympathetic control of, during acute heat stress, 182
Uterine secretory protein
Immunosuppressive effect of, from Angus and Brahman cows upon lymphocytes in vitro, 1047
Uteroferrin
Role of, in placental iron transport: Effect of maternal iron treatment on fetal iron and uteroferrin content and neonatal hemoglobin, 1303
Uterus
Blood flow, steroid secretion and nutrient uptake of the gravid, during the periparturient period in sows, 1085

V

Vaccination
Breed and swine lymphocyte antigen haplotype differences in agglutination titers following, with B. bronchiseptica, 643
Vaginal conductivity
Efficacy of using, as an indicator of the optimum time to breed in swine, 869
Virginiamycin
Effects of fiber and, on nutrient absorption, nutrient retention and rate of passage in growing swine, 400
Vitamin
Introductory remarks for the symposium on newer findings in, and mineral nutrition, 805

W

Water flow
Effects of, restriction and environmental factors on performance of nursery-age pigs, 1423
Weanling pigs
Energy utilization of, raised under pen conditions, 738
Weanling swine
An evaluation of various biological characteristics in assessing low phosphorus intake in, 1546
Weanling Thoroughbreds
Hormonal responses to high and low planes of

nutrition in, 658
Weight gain
Yield and composition of milk and, of nursing pigs from sows fed diets containing fructose or dextrose, 141
Weights
Lifetime productivity of purebred and crossbred cows of Angus and Milking Shorthorn parentage:, and scores, 1451
Wether lambs
Influence of photoperiod and prolactin on body composition and in vitro lipid metabolism in, 95
Wethers
Comparative digestion, rumen fermentation and kinetics of forage diets by steers and, 237
Effect of elemental sulfur supplementation on digestibility and metabolism of early vegetative and fall-accumulated regrowth fescue hay by, 1100
Wheat
Digestibility of, and alfalfa silage with and without wheat straw, 476
Wheat straw
Digestibility of wheat and alfalfa silage with and without, 476
Effect of high moisture and dry ammoniation of, on its feeding value for lambs, 559

Y

Yield
Estimating milk, of sows, 1281

Z

Zearalenone
Effect of purified, on early gestation in gilts, 1662
Zeolite A
Effects of, or clinoptilolite in diets of growing swine, 1536
Zeolite NaA
Response of growing lambs to clinoptilolite or, added to corn, corn-fish meal and corn-soybean meal diets, 1320
Zinc
Effect of calcium phosphates and, in salt-mineral mixtures on ad libitum salt-mix intake and on zinc and selenium status of sheep, 1594
Effect of protein deficiency on growth and plasma, concentration in genetically lean and obese swine, 710
